

NVG SHROUD

OVERVIEW

The NVG Shroud is an integrated System that mounts directly to the front of the helmet thereby providing the user with the direct center focused lighting while eliminating the need for auxiliary side mounted lights—reducing weight, encumbrances, snag hazards, and additional unnecessary equipment.

FEATURES

- Aerospace Quality Aluminum Alloy & High-Strength Impact Resistant Polymers enhance performance & durability, including water & chemical resistance.
- Conformal Coating Ensures Optimal Reliability Under Extreme Humidity – Advanced Anti-Wobble Stability Management System with self-stabilizing compression & high-endurance shock absorbers.
- Ergonomically Enhanced Shell safeguarding attachment through extending surface area
- Tether Plug prevents accidental NVG damage from drop/disengagement, yet releases when snagged or deliberate user action.
- Light Weight
- Easy installation
- Color As per requirement

TECHNICAL SPECIFICATIONS

- Weight – 45 grams
- Aluminum Alloy
